No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1983 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 31

NUMBER 1, JUNE 1983

REVIEW ARTICLE

R. P. JUNGHANS. A Review of the Toxicity of Methylmercury Compounds with Application to Occupational Exposures Associated with Laboratory Uses. 1

KENT E. PINKERTON, ARNOLD R. BRODY, DANIEL A. MCLAURIN, BERNARD ADKINS, JR., ROBERT W. O'CONNOR, PHILLIP C. PRATT, AND JAMES D. CRAPO. Characterization of Three Types of Chrysotile Asbestos after Aerosolization. 32

ANNE L. CAHILL, DENNIS NYBERG, AND CHARLES F. EHRET. Tissue Distribution of Cadmium and Metallothionein as a Function of Time of Day and Dosage. 54

DAVID KEAST AND KEVIN TAYLOR. The Effects of Chronic Tobacco Smoke Exposure from High-Tar Cigarettes on the Phagocytic and Killing Capacity of Polymorphonuclear Cells of Mice. 66

D. B. SAGER. Effect of Postnatal Exposure to Polychlorinated Biphenyls on Adult Male Reproductive Function. 76

P. DUCOS, C. MAIRE, J. C. LIMASSET, AND R. GAUDIN. *N*-Nitrosodiethanolamine in Antifreeze. 95

BETTI REISS, CHARLES TONG, SHYLA TELANG, AND GARY M. WILLIAMS. Enhancement of Benzo[a]pyrene Mutagenicity by Chrysotile Asbestos in Rat Liver Epithelial Cells. 100

ERMINIO GIAVINI, MARIANGELA PRATI, AND CLAUDIO VISMARA. Embryonic Effects of 2,3,7,8 Tetrachlorodibenzo-*p*-dioxin Administered to Female Rats before Mating. 105

K. KOSTIAL, I. ŠIMONOVIĆ, I. RABAR, M. BLANUŠA, AND M. LANDEKA. Age and Intestinal Retention of Mercury and Cadmium in Rats. . . . 111

GLENN F. RUSH, JACQUELINE H. SMITH, KEIZO MAITA, MICHAEL BLEAVINS, RICHARD J. AULERICH, ROBERT K. RINGER, AND JERRY B. HOOK. Perinatal Hexachlorobenzene Toxicity in the Mink. . . . 116

ROY J. SHEPHARD, BRUCE URCH, FRANCES SILVERMAN, AND PAUL N. J. COREY. Interaction of Ozone and Cigarette Smoke Exposure. 125

R. H. BUSCH, K. E. MCDONALD, J. K. BRIANT, J. E. MORRIS, AND T. M. GRAHAM. Pathologic Effects in Rodents Exposed to Sodium Combustion Products. 138

J. FERIN, T. T. MERCER, AND L. J. LEACH. The Effect of Aerosol Charge on the Deposition and Clearance of TiO_2 Particles in Rats. 148

J. P. Pelé, J. Dunnigan, and R. Calvert. The Hemolytic Activity of Chrysotile Asbestos Fibers: A Freeze-Fracture Study. 152

J. P. Pelé and R. Calvert. A Comparative Study on the Hemolytic Action of Short Asbestos Fibers on Human, Rat, and Sheep Erythrocytes. 164

Daniel H. Matulionis. Pulmonary Tissue and Cigarette Smoke. 2. Parenchymal Response. 176

Andrew Churg. Nonasbestos Pulmonary Mineral Fibers in the General Population. 189

Robyn P. Hillam, David E. Bice, Fletcher F. Hahn, and Carol T. Schnizlein. Effects of Acute Nitrogen Dioxide Exposure on Cellular Immunity after Lung Immunization. 201

P. F. Holt. Translocation of Inhaled Dust to the Pleura. 212

P. B. Roberts. Interactions between Cadmium and Radiation in the Killing of *Escherichia coli*. 221

W. M. Lau and M. H. Wong. The Effect of Particle Size and Different Extractants on the Contents of Heavy Metals in Roadside Dusts. . . 229

Book Reviews. 243

Number 2, August 1983

Marc Weinzweig and Roy J. Richards. Quantitative Assessment of Chrysotile Fibrils in the Bloodstream of Rats Which Have Ingested the Mineral under Different Dietary Conditions.. 245

Bernard Barhad, Nicolae Manolescu, Natalia Simionescu, and Victor Ciocnitu. Changes concerning the External Structure of Peritoneal Macrophages, due to the DQ-12 Standard Dust. . . 256

Jadwiga Chmielnicka, Ewa M. Bem, and Paweł Kaszubski. Organ and Subcellular Distribution of Cadmium in Rats Exposed to Cadmium, Mercury, and Selenium. 266

Jadwiga Chmielnicka, Ewa M. Bem, and Paweł Kaszubski. Organ and Subcellular Distribution of Selenium in Rats Exposed to Cadmium, Mercury, and Selenium. 273

S. H. Zaidi, J. W. Bhattacherjee, R. K. S. Dogra, R. P. Saxena, and Raj Mehrotra. Experimental Bagassosis: Role of Infection.. . . 279

Andrzej Lange, Lynn J. Nineham, Dorota Garncarek, and Roman Smolik. Circulating Immune Complexes and Antiglobulins (IgG and IgM) in Asbestos-Induced Lung Fibrosis.. 287

Shamshad H. Gilani and Martin Chatzinoff. Embryopathic Effects of Cyclophosphamide. 296

J. A. Raub, F. J. Miller, J. A. Graham, D. E. Gardner, and J. J. O'Neil. Pulmonary Function in Normal and Elastase-Treated Hamsters Exposed to a Complex Mixture of Olefin–Ozone–Sulfur Dioxide Reaction Products. 302

S. Cordier, G. Thériault, and H. Iturra. Mortality Patterns in a Population Living near a Copper Smelter. 311

M. McCabe, D. Maguire, and Madeleine Nowak. The Effects of Arsenic Compounds on Human and Bovine Lymphocyte Mitogenesis *in Vitro*. 323

R. J. F. Bewley and G. Stotzky. Effects of Combinations of Simulated Acid Rain and Cadmium or Zinc on Microbial Activity in Soil.. . . 332

Anne Johansson, Per Camner, Connie Jarstrand, and Anna Wiernik. Rabbit Alveolar Macrophages after Inhalation of Soluble Cadmium, Cobalt, and Copper: A Comparison with the Effects of Soluble Nickel. 340

Gerald Sonnenfeld, Russell W. Hudgens, and Uldis N. Streips. Effect of Environmental Carcinogens and Other Chemicals on Murine Alpha/Beta Interferon Production. 355

Kirk T. Kitchin and Marian T. Ebron. Maternal Hepatic and Embryonic Effects of 1,2,4-Trichlorobenzene in the Rat. 362

Andrew Churg and Patricia Wood. Observations on the Distribution of Asbestos Fibers in Human Lungs. 374

B. K. Behera and B. N. Misra. Analysis of the Effect of Industrial Effluent on Pigments, Proteins, Nucleic Acids, and the 2,6-Dichlorophenol Indophenol Hill Reaction of Rice Seedlings. 381

Ballabh Das, Virendra Misra, P. N. Viswanathan, and Qamar Rahman. Lung Mitochondria in Experimental Asbestosis.. . . . 390

Anne Johansson, Tore Curstedt, Bengt Robertson, and Per Camner. Rabbit Lung after Inhalation of Soluble Nickel. II. Effects on Lung Tissue and Phospholipids. 399

Gro B. Ramsten Wesenberg and Finn Wesenberg. Effect of Cadmium on the Immune Response in Rats. 413

H. Savolainen and P. Pfäffli. Neurotoxicity of Furfuryl Alcohol Vapor in Prolonged Inhalation Exposure. 420

C. Chaumard, A. M. Quero, G. Bouley, F. Girard, Cl. Boudene, and A. German. Influence of Inhaled Cadmium Microparticles on Mouse Influenza Pneumonia. 428

R. Bluzat and J. Seugé. Chronic Intoxication by an Herbicide, 2,4,5-Trichlorophenoxyacetic Acid, in the Pond Snail, *Lymnaea stagnalis* L. 440

HÅKAN BJÖRKLUND, MICHAEL R. PALMER, BIRGER LIND, BARRY J. HOFFER, AND LARS OLSON. Postnatal Lead Exposure Alters Spontaneous Cerebellar Purkinje Neuron Discharge. 448

R. E. ROYER, C. E. MITCHELL, R. L. HANSON, J. S. DUTCHER, AND W. E. BECHTOLD. Fractionation, Chemical Analysis, and Mutagenicity Testing of Low-Btu Coal Gasifier Tar. 460

T. WATANABE, A. KOIZUMI, H. FUJITA, M. KUMAI, AND M. IKEDA. Cadmium Levels in the Blood of Inhabitants in Nonpolluted Areas in Japan with Special References to Aging and Smoking. . . 472

J. O. HILL, R. E. ROYER, C. E. MITCHELL, AND J. S. DUTCHER. *In Vitro* Cytotoxicity to Alveolar Macrophages of Tar from a Low-Btu Coal Gasifier. 484

BOOK REVIEWS

ANNOUNCEMENT. 498

AUTHOR INDEX FOR VOLUME 31. 499

The Subject Index for Volume 31 will appear in the December 1983 issue as part of a cumulative index for the year 1983.

INSTRUCTIONS TO AUTHORS

Manuscripts. Papers may represent original research in any of the disciplines now concerned with man-environmental relationships; it is anticipated that the relevance of the findings to broad problems of environmental biology and environmental medicine will be considered. Analytical and integrative reviews are equally eligible. The editorial emphasis of the Journal is on research concerning health effects of environmental alterations, broadly considered; engineering and control efforts are well served elsewhere.

Selected Book Reviews will be included.

Submission of Manuscripts. These should be submitted in duplicate to any member of the Board of Editors or to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, New York 10029. Further, prior review of the paper may be undertaken with a member of the Board of Consulting Editors, especially one with particular competence in the area concerned (as, environmental physiology, epidemiology and biostatistics, ecology, occupational medicine, toxicology, anthropology, climatology, air pollution, environmental medicine, geophysics, etc.); this will often expedite consideration of the paper.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English. It is preferable that papers be submitted in English to ensure faithfulness to the author's meaning. If necessary, however, a translation will be arranged.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Acknowledgments* and *References* is recommended. However, variations of this format are acceptable if they provide clearer expression of the subject. In addition, section headings are often useful.

The first page of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). The second page should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. In the upper left-hand corner of each following page (including Reference pages, Tables, etc.) please type a shortened form of the title and the surname of the senior author. Please also number each of these pages.

Abbreviations. Follow the usage established by *Chemical Abstracts.* If others are utilized define on first use.

Figures and Tables. Number all figures consecutively with arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 per cent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½″ × 11″; grid lines that are to show in the engraving should be inked in black. Photographs should be glossy prints (5″ × 7″ or 8″ × 10″) with strong contrasts. X-rays should be right-reading glossy prints. Providing an overlay that indicates the most critical areas of halftones will aid in ensuring high quality reproduction.

Tables are to be typed on separate pages and numbered with arabic numerals; a table title should be included.

Footnotes. Footnotes in the text are identified by superscript *numerals* and listed on a separate sheet; in the *tables* by superscript *letters* and placed at the bottom of the table.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically at the end of the paper in the following order:

Curry, A. S. (1963). Acidic and neutral poisons. *In* "Progress in Chemical Toxicology" (A. Stolman, Ed.), Vol. 1, pp. 135–155, Academic Press, New York.

Waller, R. E., Commins, B. T., and Lawther, P. J. (1965). Air pollution in a city street. *Brit. J. Industr.* **22**, 128–138.

The names of journals should be abbreviated according to *Index Medicus,* 1980, or *Chemical Abstracts Service Source Index,* 1980. Include in the reference list articles that are "in press," but incorporate in the text or use footnotes for "manuscript in preparation," "personal communication," or "unpublished observations."

Reprints. A reprint order form will accompany galley proofs. The senior author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial communications should be addressed to ENVIRONMENTAL RESEARCH, Editorial Offices, Environmental Sciences Laboratory, Mount Sinai School of Medicine, Fifth Avenue and 100th Street, New York, N.Y. 10029. Correspondence and information concerning subscriptions should be addressed to Academic Press, Inc., Journal Subscription Department, 111 Fifth Avenue, New York, N.Y. 10003. Correspondence concerning manuscripts in production and proofs should be addressed to Academic Press, Inc., Journal Production Department, 1250 Sixth Avenue, San Diego, Calif. 92101.
